Subject: Re: IVCB CAB - Minutes from June-July-August - Revisions

Hi Chris-

Thanks for the email. I do have revisions:

June: This is complete garbage: "Kevin Lyons had some discussion about solving the parking problem, as it seems the issues really stems from Sand Harbor. Back and forth ensued regarding the bus running on SR28 and the benefit that can provide."

Here is what it should say:

Kevin reminded Jim Merino that last time TTD was here Kevin asked "what is the problem you are trying to solve?" and that we still didn't have a real answer now months later, which is one reason why people are upset. Kevin noted that there were plenty of real problems we have to solve here regarding traffic and highlighted several including the traffic blockage on 28 at Sand Harbor from parking lines there in the morning and the Kings beach traffic backups at the moronically designed roundabouts that are so bad they have to staffed with live traffic guards at peak times. Kevin noted that a transportation hub would not seem to solve any of those real and important problems and also noted that if someone wants to use public resources to do something they need to be solving a real public problem, not an imagined one. Kevin asked for the scores used to compare the different locations for a hub and Jim stated that "They'll be in the feasibility, analysis, study." and added that "We have a draft feasibility analysis." Kevin told him that he will be requesting that public record. Kevin also asked about some traffic modeling facts like the intercept rate of traffic that would be off the road with a hub and how much hub traffic would be walking vs driving and parking. Jim stated that that he didn't have any answers to any of those questions. Kevin pointed out that those were basic facts that anyone involved in a transportation project should know.

July I have revisions. This is missing at the end of the climate change item:.

Kevin mentioned that during the meeting he just looked up the data to confirm that heat was the leading cause of weather-related death and found out the claim was surprisingly completely wrong. The cold kills 5.6% vs 0.35% for heat so 16 times more people die from cold than heat in the US.

August the minutes are fine but the transcript is garbled and missing key wordx
What it says (1:52:24 - 1:52:32)

"Apparently they're using a California lawyer to advise them on the guy a lot. I swear I'm not making this stuff up. I was making it up last time."

What it should say:

"Apparently they're using a California lawyer to advise them on Nevada law. I swear I'm not making this stuff up. I was not making it up last time either."

Thanks!

Subject: IVCB CAB - Minutes from June-July-August - Revisions

Hi Denise and Kevin -

Can you indicate if you will have revisions to submit regarding the CAB minutes for the above referenced 3 months, or if not let me know? The earlier you let me know, the earlier the agenda can be posted and the community has notice of what will be discussed at our next meeting Nov. 25. Can you get back to me no later than Monday morning (i.e., there will be no revisions submitted by you, or here are your revisions)? Thank you.

Also, since the meeting following the next one is just 3 weeks later on 12/16, I will circulate the September and October minutes for approval the day after the Nov. 25 meeting and ask that all members review and make revisions by a week later. Again, this is so the County can post the agenda sooner and encourage community participation.

Thanks, Chris
