Prescription Food Pantries

We emphasize the “healthy, medical” aspect of our food pantries so we can better identify the nutritional needs to prevent or aid in the treatment of chronic disease. Our pantries are filled with fresh fruit and vegetables, whole grains, lean or plant-based proteins, and low-fat dairy products. In addition, canned vegetables are low in sodium, and canned fruit is packed in juice or water.

Receiving food from our pantries is simple. The only requirement is to be a patient at Community Health Alliance.

Community Health Worker Program

Our Community Health Workers (CHWs) are able to assist all patients.

Our team utilizes an evidence-based screening tool called the PREPARE form. Based on results, our team creates community-based organization referrals to assist patients with their needs. This can include housing, transportation, paying for medications, setting up specialty appointments, legal aid, etc.

Health Insurance Enrollment Assistance

Everyone who comes into our health centers for healthcare services is screened for health insurance eligibility, including Medicaid, Medicare, Supplemental Nutrition Assistance Program (SNAP), and additional plans that match your income.

Our Healthcare Access Specialists, who are listed below, walk you through the process so that you, and your entire family, can have peace of mind when it comes to protecting your health.
