

Washoe County Roads team is talented, but the best service is done in partnership with the community. While the crew is focused on public roads and access, residents also play a key role in keeping our community safe.

How fast and efficient we complete snow control measures is largely dependent on support within our community. **If each of us did the following, countless hours would be saved removing snow and ice from our roadways.**

Prepare ahead for winter travel.

- Reduce your speed when traveling during winter months and storms.
- Check tires and replace them with winter tires as necessary.
- Travel with road safety gear, water, and food.
- Make alternative arrangements for work and school during storms.

Delays are most often caused by redirecting limited roads and public safety personnel to winter accidents. Your efforts to stay safe directly support keeping our community moving during the winter months by keeping personnel focused on the road.

Give some grace, take some grace

- Berms Happen

Our team does everything possible to avoid berms across driveways and onto sidewalks. Unfortunately, our equipment is sized to clear over 700 miles of road averaging 20 feet wide or greater. Drivers are responsible for safe travel lanes and piles of snow can accumulate in that process.

Remove Obstacles

- Limit time trash cans sit in the street or right-of-way. Put trash cans out as close to pick up times as possible. Remove trash cans as soon as possible.
- Do not park vehicles on the street when a storm is forecasted.
- Observe winter parking restrictions in Incline Village Crystal Bay.
- Call 775-833-5555 to learn if parking is red (no) or green (go).

It is our goal to not plow through obstacles. Items such as trash cans, trailers or vehicles parked on the street will reduce our ability to clear not only your property, but an entire road. Support your neighbors and community.

Please, please stay safe

- Don't let kids play in snowbanks along the road – honestly our teams can't see them.

Operators are 100% committed to the safety of our community. One of the biggest fears of a driver is to have 12-ton machine meet one of our community members. Please do not allow children, dogs, or adults to play near roadways.
