

Protect Your Home from a SILENT KILLER

FREE CARBON MONOXIDE AND FIRE ALARMS

Join us at Bethel AME Church at 2655 Rock Blvd, Sparks Nevada at 11am February 24th

It's important to have a Fire Alarm and carbon monoxide detector in your home, especially near sleeping areas and on every level of your home. Carbon monoxide is a colorless, odorless gas that can be deadly.

* Prevention: The Nevada Office of State Epidemiology emphasizes the importance of prevention. They recommend installing carbon monoxide detectors on every level of your home, especially near sleeping areas, and testing them regularly.

Where to find more information:

* Nevada Office of State Epidemiology: This website may have more specific data or reports on carbon monoxide poisoning in Nevada.

* Local fire departments: Contacting your local fire department can provide you with information about carbon monoxide incidents in your area.
